

▲ Add.

1.

$$\begin{array}{r} 5,352,304 \\ 621,784 \\ 75,928 \\ 9,060 \\ + \quad 331 \\ \hline \end{array}$$

2.

$$\begin{array}{r} 257,351 \\ 345,103 \\ 463,829 \\ 34,615 \\ + 16,429 \\ \hline \end{array}$$

3.

$$\begin{array}{r} 6,072,580 \\ 1,638,227 \\ 410,300 \\ 5,788 \\ + \quad 942 \\ \hline \end{array}$$

4.

$$\begin{array}{r} 553,047 \\ 260,042 \\ 38,452 \\ 4,276 \\ + \quad 743 \\ \hline \end{array}$$

5.

$$\begin{array}{r} 71,331 \\ 25,638 \\ 40,205 \\ 60,873 \\ + 9,735 \\ \hline \end{array}$$

6.

$$\begin{array}{r} 4,528,633 \\ 476,229 \\ 313,531 \\ 145,003 \\ + 23,068 \\ \hline \end{array}$$

▲ Round . . .

1. to the nearest ten thousand.

9,468,354

79,850,621,995

64,219,003

2. to the nearest hundred million.

301,426,999

26,081,116,746

723,310,577,025

3. to the nearest ten.

834,290,776,359

57,831,421

268,629,893,115

▲ Write the LCM for each set of numbers.

1. 6 and 9 _____

2. 7 and 2 _____

3. 8 and 3 _____

4. 5 and 4 _____

5. 2 and 9 _____

6. 9 and 3 _____

Bonus Box: Write an even number that has seven digits. The sum of the digits is 5.
