“Name That Number” Game Practice

Parents, we learned the game “Name That Number” today in class. Please have your child explain the game to you. This is a great game because it encourages children to know their math facts, and it allows them to use simple or complicated problems to reach the target number.

Directions: Find four ways to reach the target number. Remember, you can use addition or subtraction facts, but you can only use each card once per problem.

5 3 2 10 7 Target Number: 12

15 2 5 8 1 Target Number 7
