REVIEW

Directions: Read the passage and the table. Then read each question about the passage and the table. Choose the best answer to the question. Mark the space for the answer you have chosen.

Safe in a Tornado

Since a tornado can happen almost anywhere, it is a good idea to know how to be safe if a tornado strikes. The table gives some safety tips.

In School
Follow teacher's instructions. Go to a safe place without many windows. Cover your head with your hands.
At Home
Go to the basement, into a closet, under stairs, or under large furniture. Have a flashlight, battery radio, candles, matches, and water handy. Wait until the storm has passed before leaving your safe place.
Outside
Find shelter. Lie down in a ditch or enclosed area. Cover your head with your hands. Stay away from trees and water. Do not stay in a car.

- This table is about safety in—
 school, at home, and outside.
 a shelter, a closet, and a car.
 a basement, a car, and a ditch.
 your school and home.
- At home, it is important to—
 lie down in a ditch.
 have a flashlight and batteries.
 stay away from trees.
 follow your teacher's instructions.
- If you are outside when a tornado strikes, you must never—
 get away from trees.
 cover your head.
 stay in a car.
 go into a ditch.
- In school, you may have to—
 have a flashlight.
 cover your head.
 lie down in a ditch.
 get away from water.
- What is a good title for this table?
